Brainy Bunch Homework Week of November 9

Choose at least one math game or activity to practice math facts and record it on your homework log and play:

Trading Up Game

Materials:

gameboard (attached)

coins

2 dice

optional: Brainy Bunch Bucks (attached)

How to Play:

Take turns tossing 2 dice, calculate the sum and take that many cents from the "bank." The student places these coins on his/her game board. The player "trades up" to higher value coins whenever possible and replaces coin collections with the larger value coin. The first player to trade up to the dollar bill wins the game.
